GOAT ACADEMY

Chapter 1: Introduction to The Wall Street Protocol

The Wall Street Protocol is a systematic approach to stock analysis that combines technical indicators, volume analysis, and risk management principles. This framework helps investors identify high-probability trading opportunities while maintaining strict risk controls.

Key Principles:

- Capital preservation is the top priority
- Follow a systematic, rule-based approach
- Never average down on losing positions
- Maintain proper position sizing (max 2% risk per trade)
- Document every trade decision for continuous improvement

Chapter 2: The Complete Assessment Framework

Overview

The Wall Street Protocol uses a multi-layered approach to stock assessment. Every criterion in the entry phase must be met before considering a position. Any single exit criterion triggers an immediate sale decision.

The Four Pillars of Analysis:

9. 1. Breakout Confirmation - Price action and resistance levels
10. 2. Moving Average Conditions - Trend identification
11. 3. Volume Analysis - Institutional participation confirmation
12. 4. Mansfield Relative Strength - Sector momentum assessment

Chapter 3: Entry Criteria Breakdown

Criterion 1: Breakout Confirmation ✓

A valid breakout requires price to move decisively above a clearly defined resistance zone. This resistance must be validated by at least 3 prior touches, showing institutional recognition of this level.

Criterion 2: Moving Average Conditions ✓

Moving averages help identify the underlying trend. Both conditions must be met to ensure we're trading with the momentum.

- □ Price is above 50-day Moving Average

Criterion 3: Volume Analysis ✓

Volume confirms institutional participation. Without proper volume, breakouts often fail.

- □ Breakout volume is at least 2x recent average

Criterion 4: Mansfield Relative Strength ✓

Mansfield Relative Strength measures how a stock performs relative to the overall market. We want stocks that are outperforming.

Chapter 4: Exit Rules & Risk Management

Exit rules are non-negotiable. They protect capital and ensure small losses don't become large ones. ANY single exit criterion triggers immediate action.

Felix sets a stop loss for every position in his portfolio.

Chapter 5: Intel Corporation (INTC) Bull Case Study

Let's apply fundamental analysis alongside our technical framework. Here's the bull case for Intel as a beginner-friendly investment opportunity, focusing on turnaround potential, government support, and strategic positioning in AI and chip manufacturing.

1. U.S. Government Support & Domestic Manufacturing

Intel has secured $7.86 billion in U.S. government grants to build domestic chip foundries, with $5.66 billion still pending. This positions Intel as a key player in the U.S. semiconductor supply chain reshoring effort.

Key Data Point: $7.86 billion in secured government grants

Source: Yahoo Finance - Intel Corporation (INTC): A Bull Case Theory

2. Leadership Transformation & Cost-Cutting

Under new leadership, Intel is targeting $10 billion in cost savings by 2025. This aggressive cost-cutting aims to restore efficiency and profitability as the company launches new, competitive chips like the 18A process node.

Key Data Point: $10 billion targeted cost savings by 2025

Source: Yahoo Finance - Intel Corporation (INTC): A Bull Case Theory

3. AI and PC Refresh Cycle Opportunity

Intel is well-positioned to benefit from the coming PC refresh cycle and the rise of AI-capable PCs. Intel's chips are showing strong performance in AI inference tasks, a rapidly growing market segment.

Key Focus: AI inference capabilities in growing PC refresh cycle

Source: InvestorPlace - Don't Write Off Intel Just Yet: The Bull Case for INTC Stock

4. Foundry Business Expansion

Intel is investing tens of billions to build a foundry business that could rival TSMC. The goal is to capture share of the $80+ billion third-party foundry market as global customers seek alternatives to Asia-based suppliers.

Key Market: $80+ billion third-party foundry market opportunity

Source: The Motley Fool - The Bull Case for Intel: TSMC's Crazy Pricing Power

5. Valuation and Return Potential

If Intel successfully executes its turnaround and returns to historical profit margins and valuation multiples, some analysts project potential returns of 3.5x to 5x by 2030, translating to approximately 27% compound annual growth rate.

Key Projection: Potential 3.5x to 5x returns by 2030 (27% CAGR)

Source: Finviz - Intel Corporation (INTC): A Bull Case Theory

Risk Considerations

While the bull case is compelling, execution risk remains significant. Intel must successfully:

- • Execute on new chip manufacturing processes (18A)
- • Compete effectively with TSMC and other foundries
- • Deliver on promised cost savings
- • Capitalize on AI and PC refresh opportunities
- • Navigate intense semiconductor industry competition

Chapter 6: Practical Application Worksheet

Use this worksheet to apply The Wall Street Protocol to any stock you're analyzing. Complete each section before making any investment decision.

Stock Analysis Worksheet

Stock Symbol: ___________ Date: ___________

Current Price: ___________ Sector: ___________

Entry Criteria Checklist (ALL must be ✓)

□ Breakout Confirmation:

- Resistance level identified: $______
- Number of prior touches: ______
- Breakout is clean: Yes/No
- Sector in uptrend: Yes/No

□ Moving Average Conditions:

- Price above 50-day MA: Yes/No
- 50-day MA sloping up: Yes/No
- Price above 150-day MA: Yes/No

□ Volume Analysis:

- Today's volume: ______
- 5-day average volume: ______

□ Mansfield Relative Strength:

- Currently in uptrend: Yes/No
- Recently turned positive: Yes/No

Risk Management Planning

Position Size Calculation:

- Account size: $______
- Risk per trade (1-2%): $______
- Entry price: $______
- Stop loss price: $______
- Risk per share: $______
- Number of shares: ______

Chapter 7: Weekly Monitoring Checklist

Successful investing requires ongoing monitoring. Use this weekly checklist to stay on top of your positions and market conditions.

Weekly Review Template

Date: ___________

Price Action Review:

□ Price still above 50-day MA?

□ Price still above 150-day MA?

Volume Analysis:

□ Still showing institutional support?

□ Any unusual volume spikes?

□ Volume confirming price moves?

Stop Loss Management:

□ Any stops need adjustment?

Fundamental Updates:

□ Any major news or earnings?

□ Sector performance vs market?

□ Any changes to investment thesis?

Action Items:

□ ______________________

□ ______________________

☐ ______________________

Chapter 8: Additional Resources

Continue your investing education with these recommended resources and tools.

Useful Websites & Tools:

- • Yahoo Finance (free charts and data)
- • TradeVision (advanced charting and news)
- • Finviz (stock screening)
- • SEC.gov (company filings)

Key Reminders:

- 🎯 'Everyone is a genius until the market crashes...'
- 🛡️ Protection of capital is priority #1
- 📊 Stick to the rules - no exceptions
- 📝 Document every trade decision
- 📈 Review and learn from every trade
